PERIIA Network

Pan European Research Infrastructure ILOs Association

Be a key intermediary between the European supplier business/industry and big science-organisations for matters related to procurement, innovation and tech-transfer opportunities.

- Enhance the big science-organisations' interaction with business/industry in order to create an integrated and sustainable big science-market.
- Raise awareness and improve access for business/industry (particularly SMEs) entering and acting on the big science-market.
- Provide a forum for the exchange of best practices on how to work as an ILO.
- Enhance the cohesion and functioning of ILO networks at relevant big science-organisations.
- Act as a consultative reference body for other European/International stakeholders.

BSBF preparation

- Parallel session moderation
- Technology Transfer Track
- International Organization Committee
- SME Track
- BSBF industrial promotion
- National corners exhibition
- BSBF webinar collaboration for organization and promotion
- General Assembly of ILOs – Industrial Liaison Officers

PERIIA Working Groups

- Facilitating pan-European partnering between companies on the big science market
- Bringing down entry barriers for SME on the Big Science market
- The role of the ILO in facilitating technology transfer

Relations with other bodies and stakeholders

- European Commission
- ENRIITC project
- Industrial Associations
- Big Science Organizations
