S25 Desk Calculator

Practical, smart and fun!

Features:

- Mental maths quiz function
- All basic calculator functions
- Pi button which is equal to 3.14
- Multiples practice function
- Easy percentage calculation button
- Recommended by primary school teachers.

Specifications:

Power On/Clear/Clear Entry Key
Clear All Key
Multiplication Table Drill Mode Key
Math Drill Mode Key
Question Count Switch Key
Equals/Enter Key
Square Root Key
Pi Key

Type:	Electronic Calculator
Operating Capacity:	10 digits
Power Supply:	Built-in Solar Cell and Lithium Battery (3.0 VDC CR2025 x 1)
Dimensions:	83mm x 125 mm x 19 mm
Weight:	64 g
Accessories:	Lithium Battery (installed), Operational Manual

Practice your mental maths – the calculator asks random questions which the student has to answer by typing in the answer and pressing equals. The calculator marks the answer either right or wrong. If the answer is correct the student is asked another question. If the answer is incorrect, then the calculator repeats the question until the student gets the correct answer. If the student doesn't know the answer, the student can ask the calculator what it is by leaving the answer space blank and pressing equals; the calculator will then show the student what the correct answer is.

At the end of the drill, the student will get a mark (out of 25, 50 or 100 questions) and a percentage. The questions are designed with primary school learners in mind – so addition has sums up to 40, minus is the opposite, multiplication is from 0 to 12 times 0 to 12, and divide will do the opposite of multiplication (without dividing by zero).
